

# How To Use

## Insert Card

→  
Instead of swiping, you'll insert the card into the terminal, chip first, face up.

## Leave the Card in the Terminal

→  
The card must remain in the terminal during the entire transaction.

## Sign the Receipt or Enter a PIN

→  
Either sign the receipt or enter your PIN to complete the transaction.

## Remove Your Card

→  
When the purchase is complete, remember to take your card with you.

Remember: The chip card still has a magnetic stripe, just in case you need to use it with a traditional terminal.
